

# DOI uses cases for data

Jan Brase  
DOI outreach meeting

November 21<sup>st</sup>  
Milano

# What if any kind of scientific content would be citable?

High visibility of the content

Easy re-use and verification.

Scientific reputation for the collection and documentation of content (Citation Index)

Encouraging the *Brussels declaration on STM publishing*

Avoiding duplications

Motivation for new research

# Prologue

In 1998 a paper was published from GFZ Potsdam analysing the idea of using DOI names for data citation  
At the 17th International CODATA Conference (2000) in Italy the German CODATA group discussed this further

Leading to a German working group 2000 – 2002 founded by the German Research foundation (DFG)

# Project

2003 – 2007 The DFG founded a project „Citability of primary data“

Members:

- WDC MARE Bremen (PANGAEA)
- WDC CLIMATE Hamburg
- GFZ Potsdam
- TIB Hannover

# 2004: First DOI names registered for data

First DOIs from project partners:

18.03.2004: doi:10.1594/WDCC/EH4\_OPYC\_SRES\_A2 (DOI #1)

22.07.2004: doi:10.1594/GFZ/ICDP/KTB/KTB-GEOCH-GASCHR-P

14.12.2004: doi:10.1594/PANGAEA.119754

End of 2004: about 30 DOIs registered and in library catalogue TIBORDER

The screenshot shows the WDCC homepage with the DKRZ logo and navigation links for 'Citation elements', 'Publication Year', 'Title', 'DOI Publisher', 'Identifier', 'Detailed Metadata', 'Data Access', and 'Summary'. A large red 'DOI #1' is overlaid on the page. The 'Identifier' section shows the DOI:10.1594/WDCC/EH4\_OPYC\_SRES\_A2.

The screenshot shows the TIBORDER catalogue search results for 'stendel, martin'. The results list a single item: 'ECHAM4\_OPYC\_SRES\_A2: 110 years coupled A2 run 6H values / World Data Center for Climate (WDCC), Hamburg. Martin Stendel; Torben Schmitt; Erich Roeckner ...'. The search bar also contains 'suchen [und] Person, Autor'.

# Think global – act local

## **Science is global**

- it needs global standards
- Global workflows
- Cooperation of global players

## **Science is carried out locally**

- By local scientist
- Being part of local infrastructures
- Having local funders

# DataCite

Global consortium carried by local institutions focused on improving the scholarly infrastructure around datasets and other non-textual information

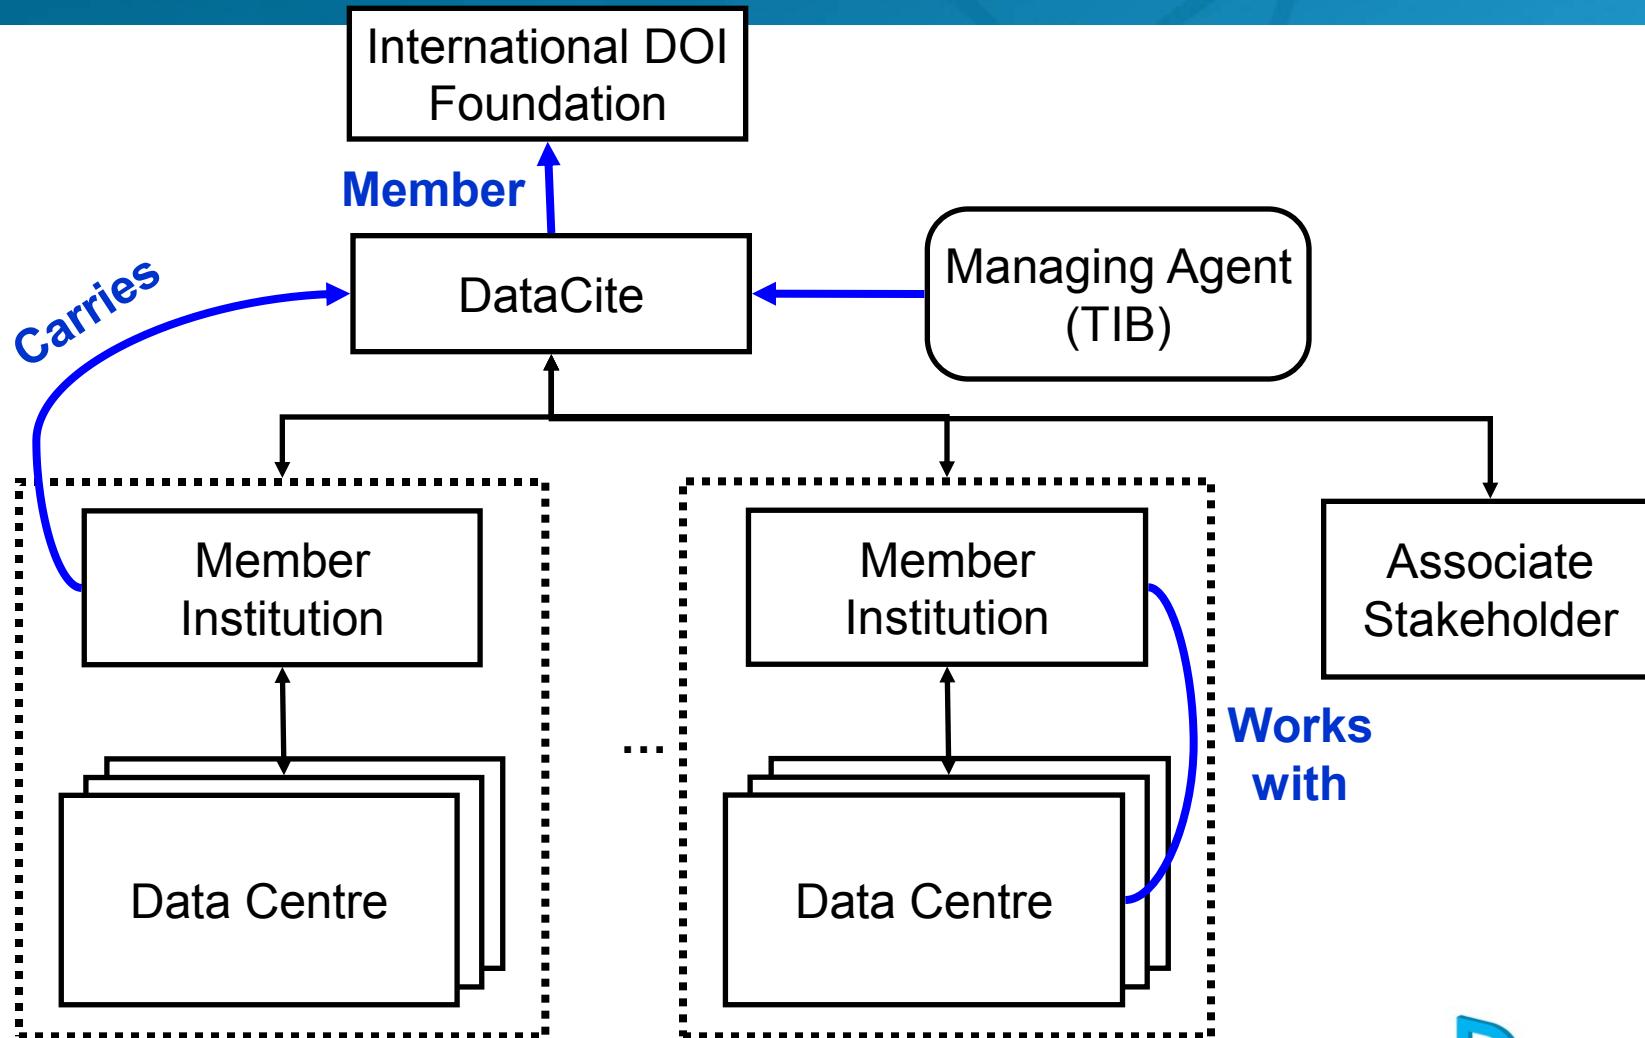

focused on working with data centres and organisations that hold content

Providing standards, workflows and best-practice

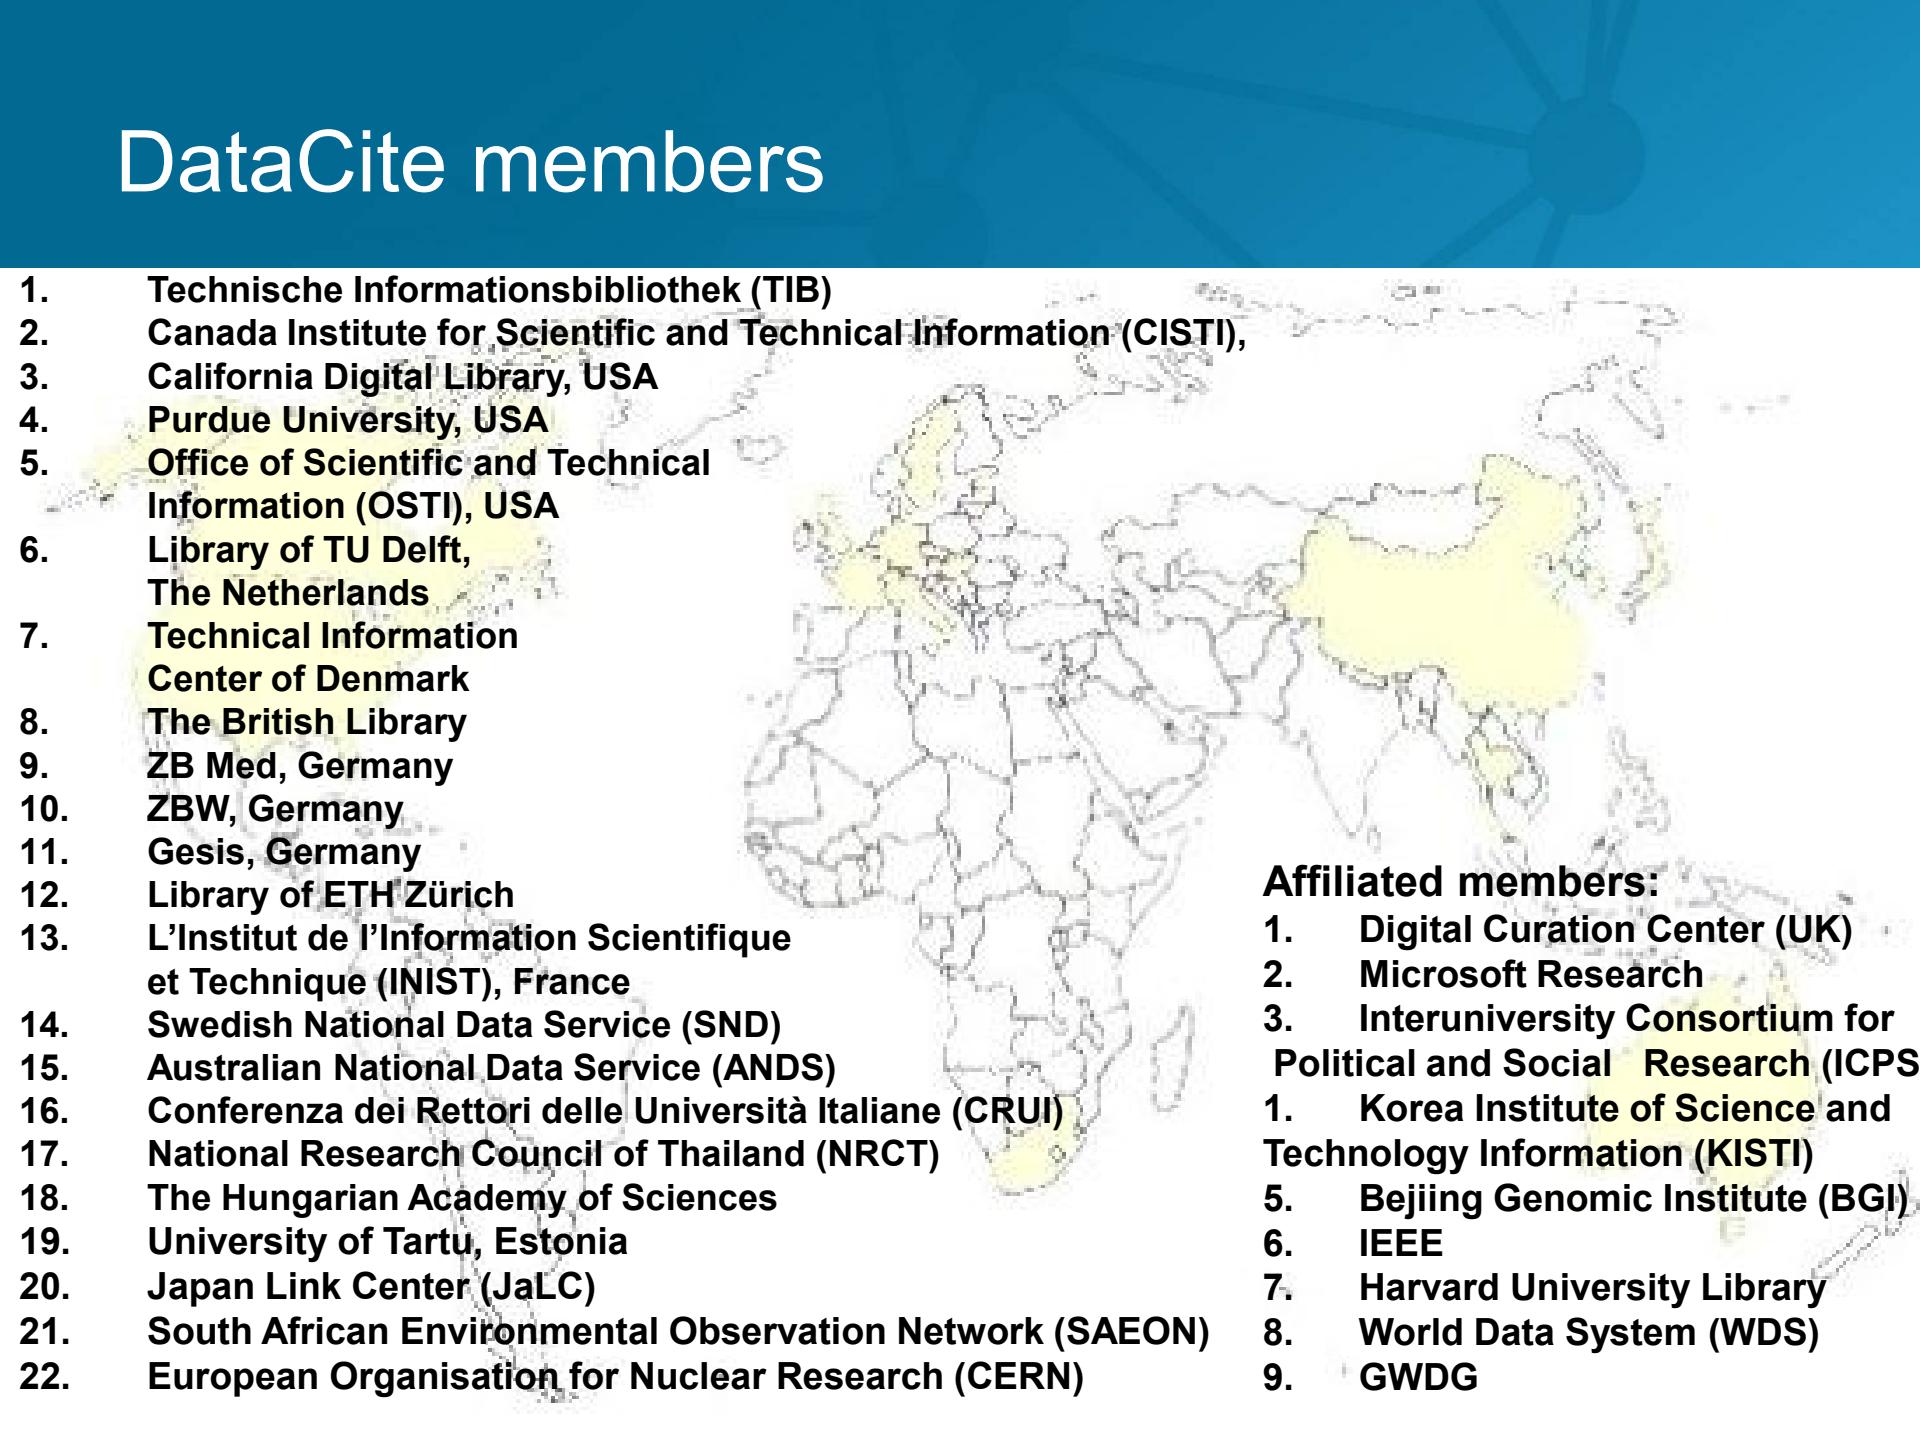

Initially, but not exclusively based on the DOI system

Founded December 1st 2009 in London

# DataCite structure

# 2012: STM, CrossRef and DataCite Joint Statement

1. To improve the availability and findability of research data, the signers encourage authors of research papers to **deposit researcher validated data in trustworthy and reliable Data Archives**.
2. The Signers encourage Data Archives to **enable bi-directional linking between datasets and publications** by using established and community endorsed unique persistent identifiers such as database accession codes and DOI's.
3. The Signers encourage publishers and data archives to make visible or increase **visibility of these links** from publications to datasets and vice versa

# Example

## The dataset:

Storz, D et al. (2009):

*Planktic foraminiferal flux and faunal composition of sediment trap L1\_K276 in the northeastern Atlantic.*

<http://dx.doi.org/10.1594/PANGAEA.724325>

## Is supplement to the article:

Storz, David; Schulz, Hartmut; Waniek, Joanna J; Schulz-Bull, Detlef; Kucera, Michal (2009): *Seasonal and interannual variability of the planktic foraminiferal flux in the vicinity of the Azores Current.*

Deep-Sea Research Part I-Oceanographic Research Papers, **56(1)**, 107-124,

<http://dx.doi.org/10.1016/j.dsr.2008.08.009>

# More Data example

- Higgs particle

ATLAS Collaboration ( 2013 ) HepData,

<http://doi.org/10.7484/INSPIREHEP.DATA.A78C.HK44>

- ECOLI outbreak

Li, D et al (2011):

*Genomic data from Escherichia coli O104:H4 isolate TY-2482.*

BGI Shenzhen.

<http://dx.doi.org/10.5524/100001>

# Latest developments

ODIN project with ORCID.

<http://datacite.labs.orcid-eu.org/>

MoU with Thomson reuters to cooperate on data citation index

DataCite plugin for next D-Space release

Agreement with Re3Data and DataBib to include their service in 2016

MoU with RDA to become organisational affiliate
