

**EIDR**

Entertainment Identifier Registry

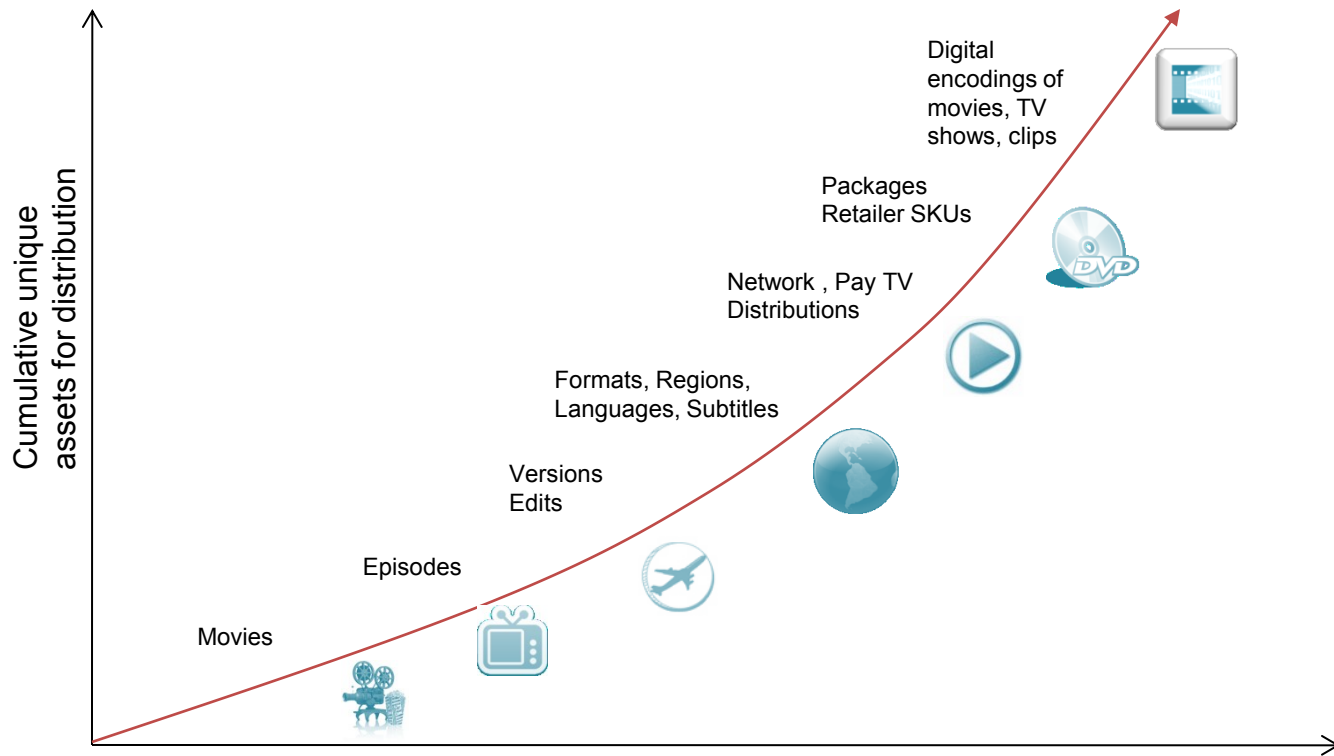

## Overview

November 2014

# The Need for a Global Unique Identifier Registry

# Millions of film and TV products created each year

# What is EIDR – one page summary

## What EIDR is

- Global** registry for **unique** identification of movie and TV content
- Designed** for automated machine-to-machine communication
- Flexible** data hierarchy down to the product & SKU level, incl. edits, clips, composites, encodings, and relationships

## EIDR Purpose

- Make digital distribution **competitive**
- Help** reduce costs
- Improve** collaboration and automation across multiple application domains & platforms
- Enable** new businesses and create new efficiencies

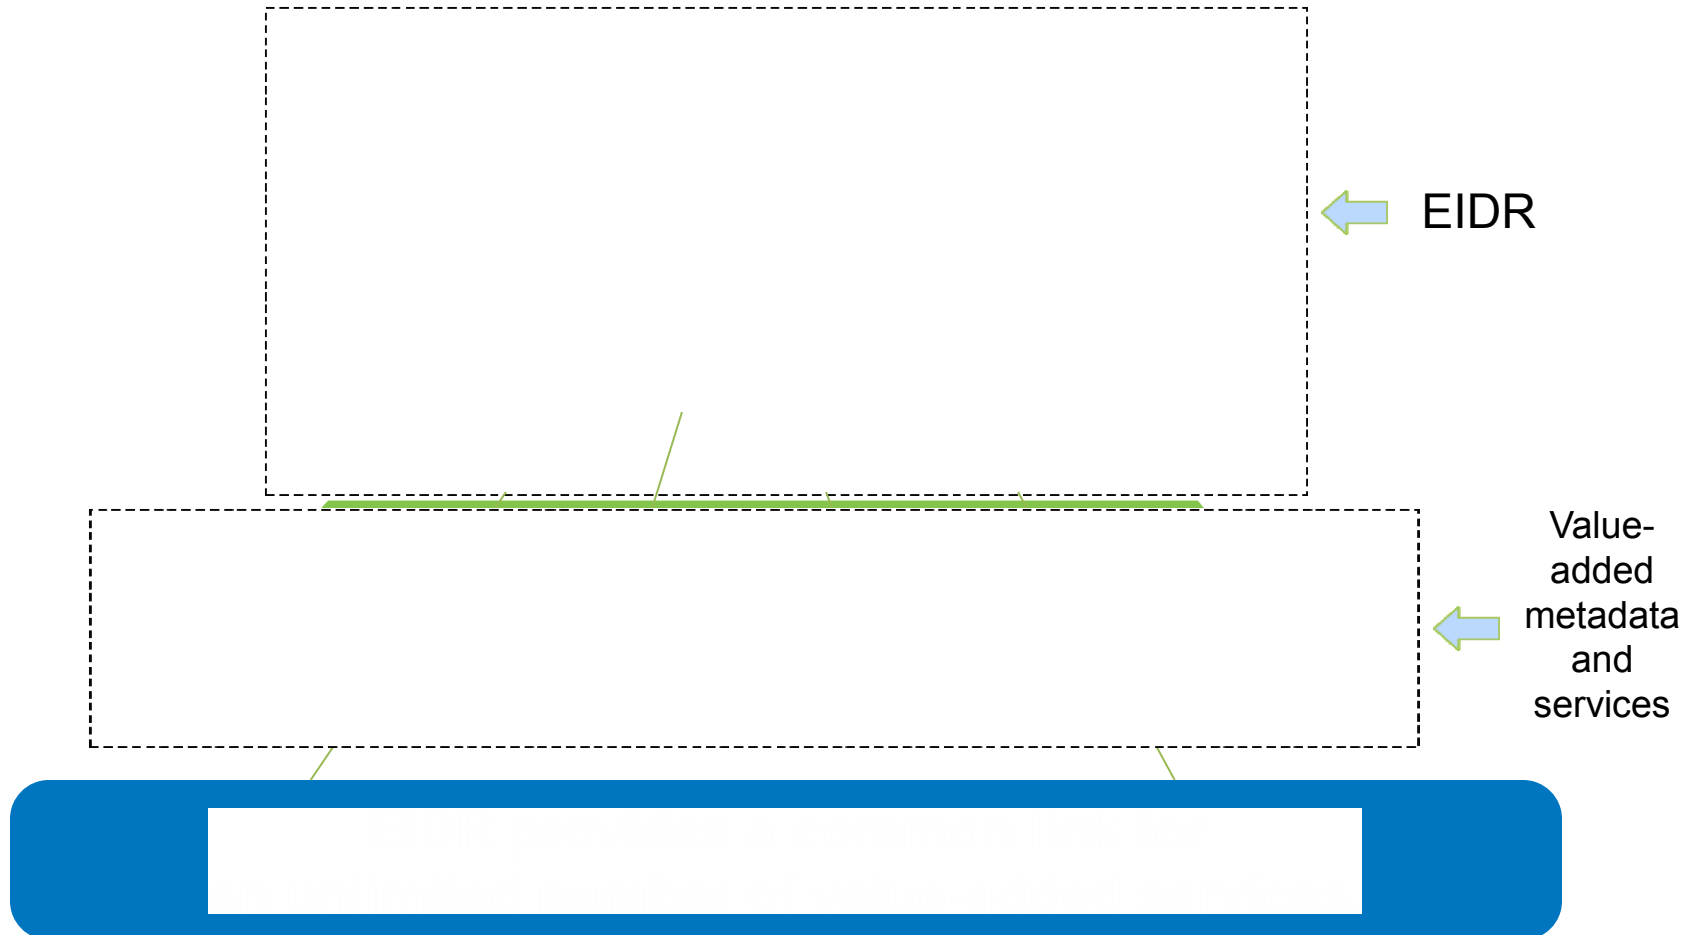

## What EIDR is Not

- Profit-making**
- Rich commercial metadata
- Ownership** or **rights** information
- US-only

## EIDR Technology Summary

- Interoperable**, **standards-based** infrastructure
- Built on **ISO** Digital Object Identifier (DOI) standard
- Application integration through **public APIs** and schemas, freely available SDK for members
- Efficient** infrastructure for new and existing applications

# EIDR – enabling scalable content services

# What EIDR helps the industry do

- More profitable online distribution
- Automated VOD delivery, ingestion & dynamic ad insertion
- Direct audience measurement across platforms
- Accurate metadata matching & acquisition
- Faster data roll-up across platforms, workflows, and channels
- Efficient catalog matching & ingest
- Standardized content discovery across operators, vendors, platforms & geographies
- Automated rights reporting & recovery

# Who is EIDR?

## Archives

## Producers & Programmers\*

\*Including wholly-owned affiliates, e.g. ESPN, et al

## Aggregators

## Distributors

## Reporting, tracking, business intelligence

## Infrastructure and media services

## Metadata

## Industry & standards organizations

# Independent non-profit registration agency

- Built and run by the industry
- Supported by annual member dues
  - Tiered dues based on size
  - Membership open to large and small ecosystem players
- Board of directors chosen from among promoter members
  - 9-member board with ability to expand as needed
  - CableLabs, Comcast, Deluxe, Disney, MovieLabs, Rovi, Sony Pictures, Warner Bros, Google
- Commitments in by-laws to cost-recovery model, open terms of use, and IP non-assert
- Participants control new features and technical development through Technical Working Group

The WALT DISNEY Studios

# Straightforward annual fee structure

Annual Revenue	Basic User Fee	Promoter Fee (includes Basic User Fee)	Board fee (includes Promoter Fee)
< \$100M	\$5,000	\$35,000	\$40,000
\$100M - \$500M	\$10,000		
\$500M - \$1B	\$20,000		
>\$1B	\$25,000		

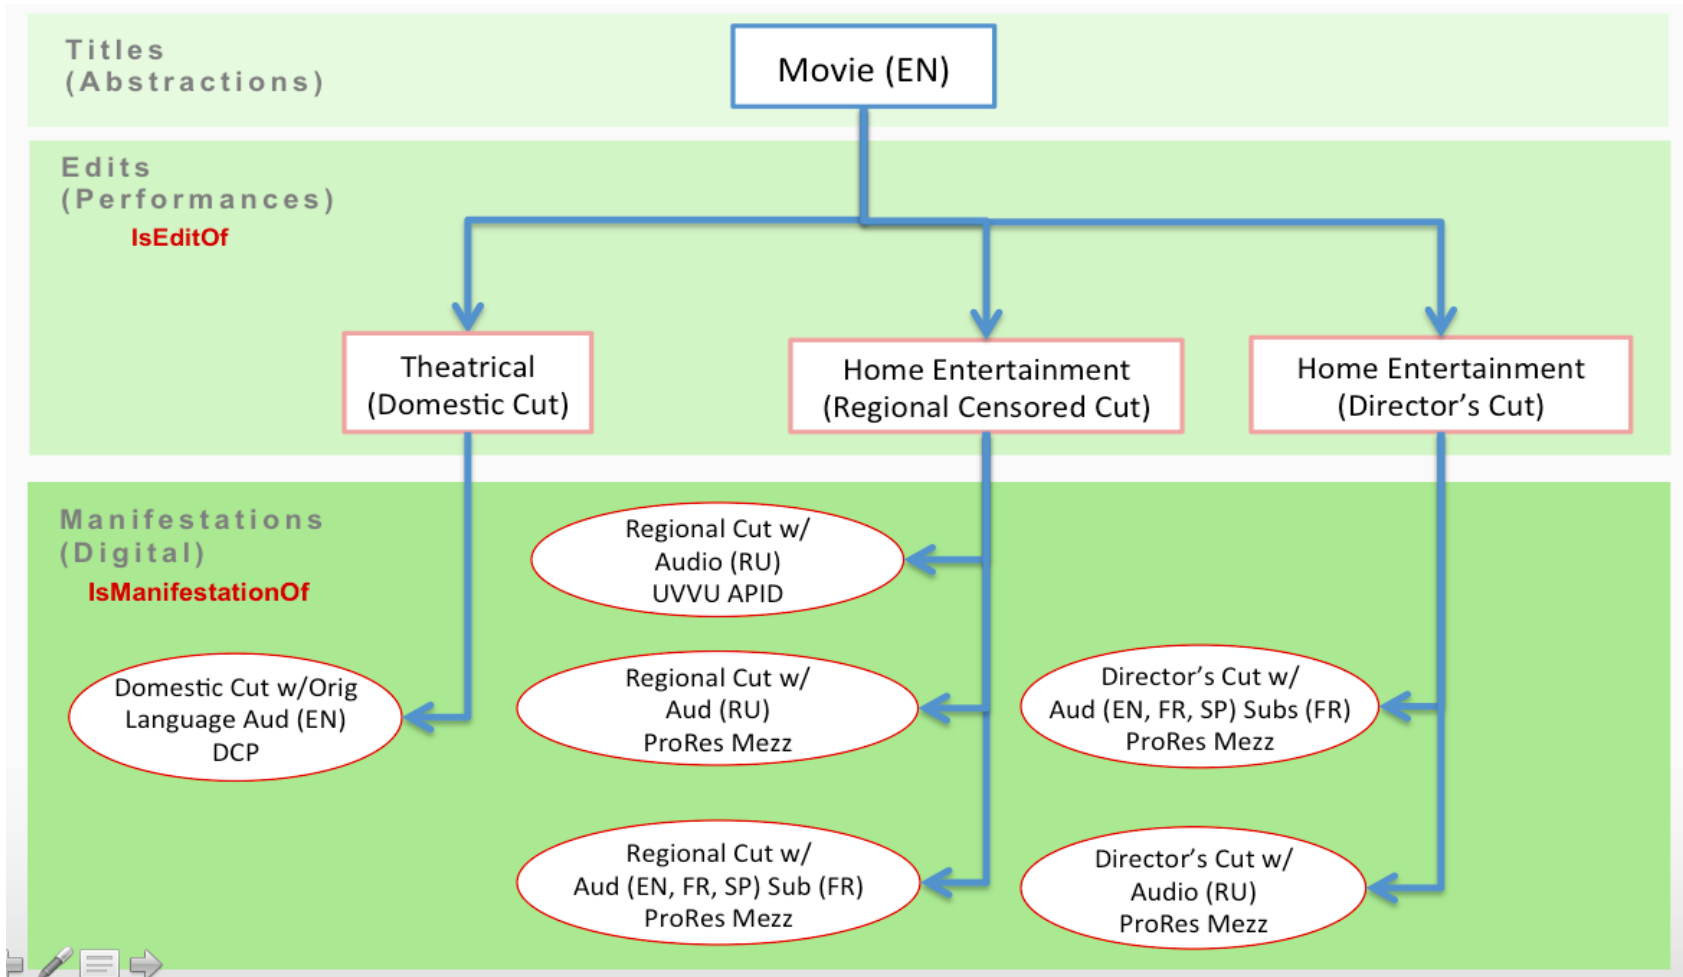

# Newest Members

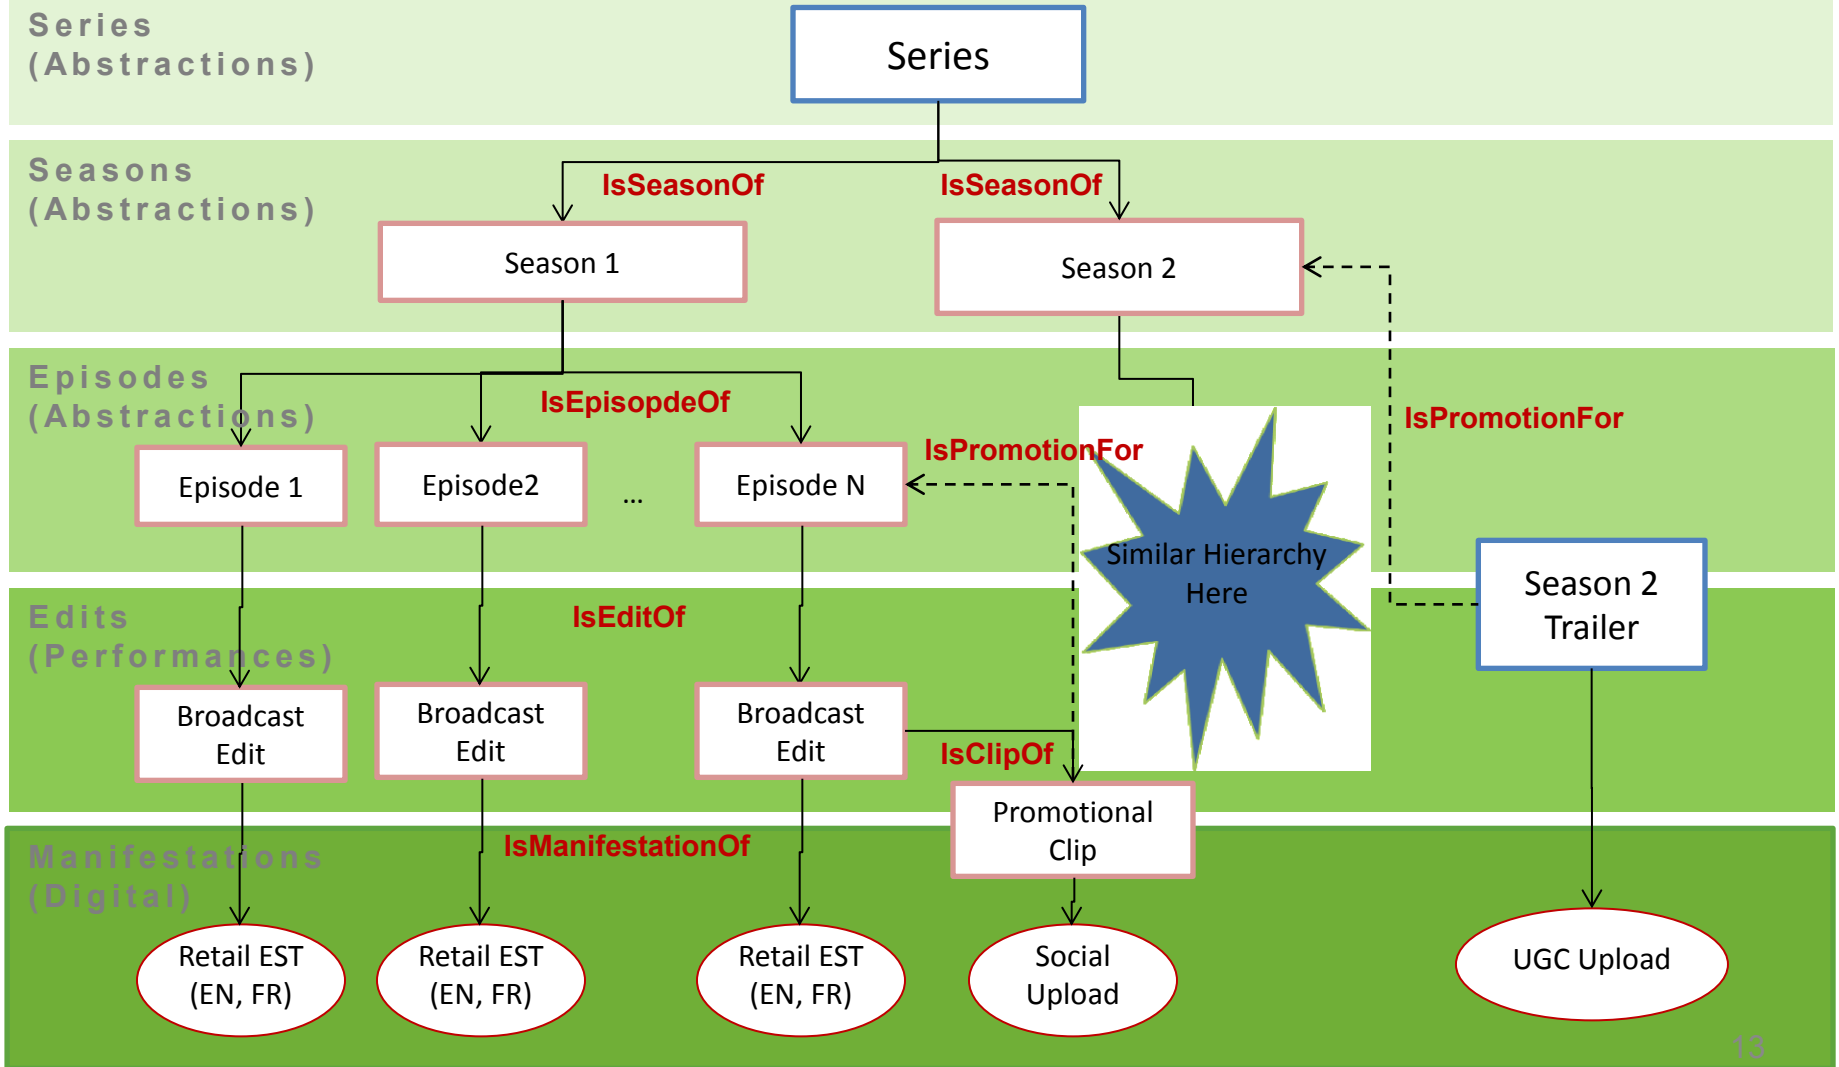

- **ITV**
  - Also joins board of directors
- **Archives**
  - US Library of Congress, IndieCollect
- **Metadata providers**
  - BindInc, media-press tv, ebs
- **Advertising and metrics**
  - AdGorilla, ScreenPlay
- **Services and infrastructure**
  - ODMedia, CSG/ContentDirect
- **UK AV Agency**
  - Founders of ISAN UK
  - Continues its role as an ISAN RA
  - EIDR service bureau for small producers
  - Provides EIDR/ISAN cross-registration for those who want it
  - Local support services for EIDR in the UK

# Data Model

# Example EIDR movie hierarchy with multiple versions

# Example EIDR episodic hierarchy

# Growth rate

# Database overview: record types

Category	Dec-10	Dec-11	Dec-12	Dec-13	Oct-14
Title-level records:					
Movies	43,573	45,774	51,501	75,800	122,850
Shorts	1,121	1,224	1,406	3,039	6,962
One-Time-Only TV	17,952	22,199	26,112	29,709	31,865
TV Episodes	105,891	130,284	158,371	313,328	343,737
TV Series	7,541	8,719	9,613	13,409	14,714
TV Seasons	7,837	9,486	12,197	18,082	20,596
Edits & Manifestations	0	3,460	20,701	128,379	169,708
<b>Total records</b>	<b>183,915</b>	<b>221,146</b>	<b>279,900</b>	<b>581,746</b>	<b>710,588</b>

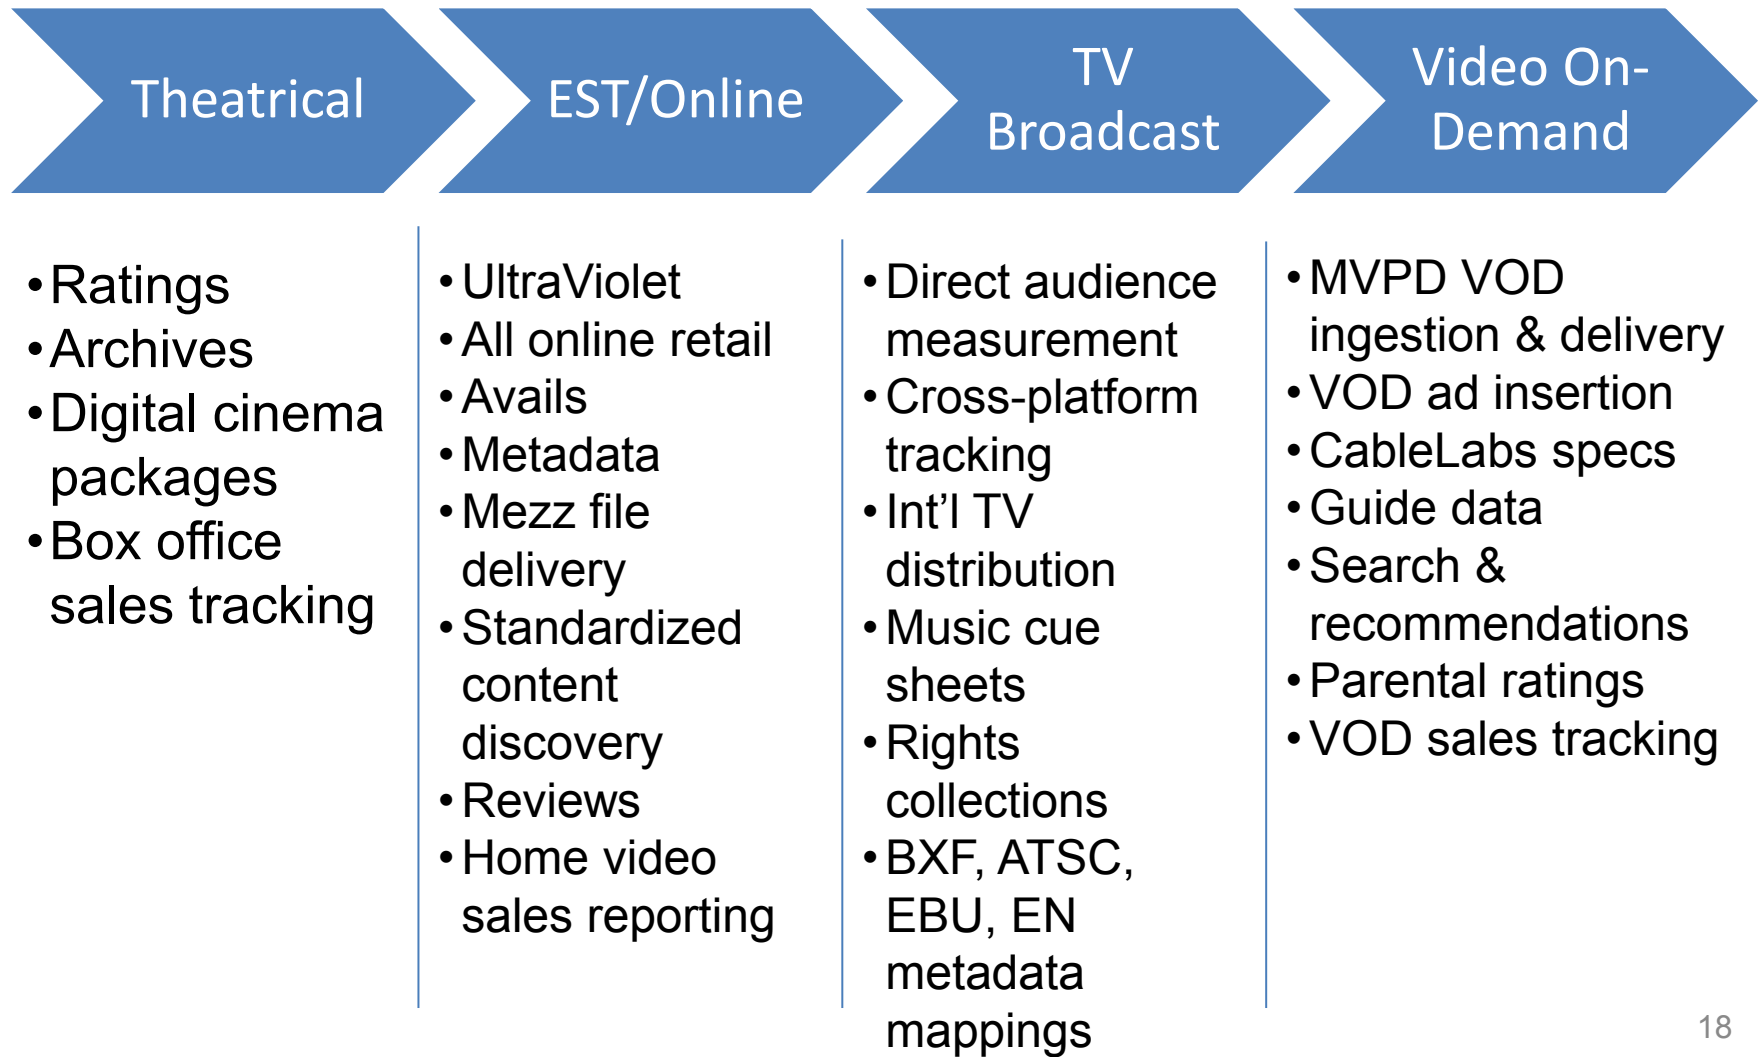

# Alternate IDs

Type	Volume
Sony	201,358
Warner Bros.	112,054
ISAN	79,645
IMDb	77,551
Flixster/Rotten Tomatoes	71,340
Baseline	65,341
Veronica	30,803
Netflix	27,255
Red Bee	25,928
The Cinema Source	20,942
Amazon	17,913
ITV (2 kinds)	14,456
NBCUniversal	13,854
BFI	5900

# Use Cases

# Developing applications across media windows

# Saves money

- Match once, then never again
  - Integrate with new vendors & partners faster and cheaper
  - Purchase metadata from any source with one ID
- Reuse one ID across all work flows
  - No need to reinvent the wheel for every work flow & channel
- Streamline consolidation of supply chain and performance data
  - Improve reporting/invoicing capabilities
  - Reduce fuzzy text matching of orders, deliveries, invoices, & reports
  - Speed internal roll-ups & reports
  - Text string processing is expensive
- Reduce customer queries on deliveries, versions, assets
- Reduce manual QC efforts on deliveries

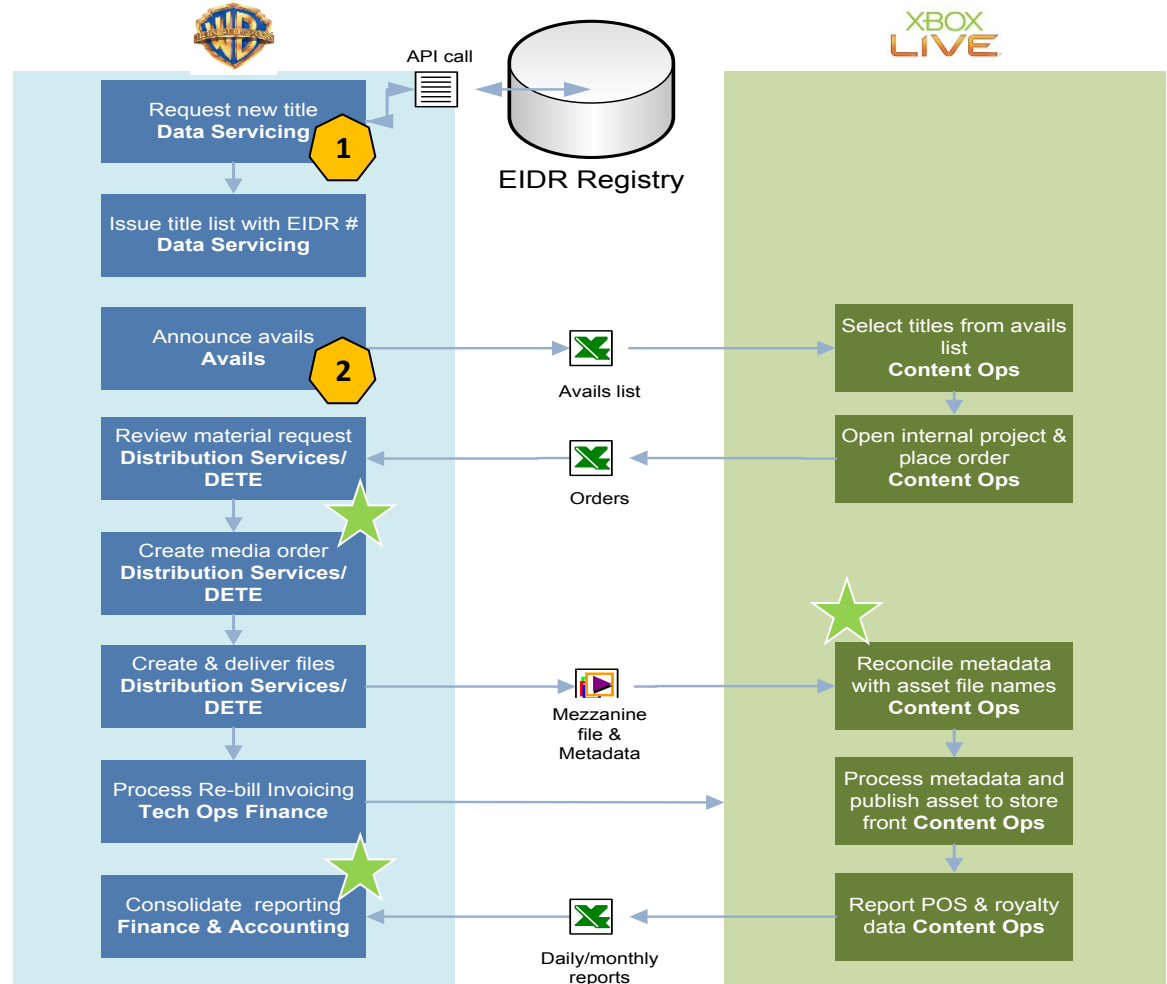

# Case study - Warner Bros & Xbox Live

## Integration Points

- WB's MSB metadata management system to the EIDR directory. Requests and applies new EIDR #'s to WB titles. **1**
- WB's MSB system to the Avails system (RRTS) to provide the EIDR # on avails titles **2**
  - Facilitating Microsoft reporting back to WB with EIDR detail

## Benefits Identified

- Reduction in QC efforts
- Reduction in customer queries
- Improved reporting / invoicing capabilities

# Savings with one partner

- EIDR added to ordering, delivery, sales and royalty reporting
- Results for one studio and one retailer
  - Direct savings = 650 hours/year (partial implementation)
  - Future savings = 1,100 add'l hours/year (full implementation)
- Assume 5 partners = 8,750 hours/year

# Enables automation

- WB/Xbox case study identified savings w/o automation
- EMA, DEG, MovieLabs, DECE cooperating on specs to enable automation
  - Rely on a common ID to link data across work flows
  - Avails, metadata delivery, file delivery, reporting
- Deployed now - Google Play & studios automating avails
- Comcast automating VOD ingestion
  - System matches programmer deliveries with metadata using EIDR IDs
- Cable industry automating DAI for VOD
- Studios, metadata providers, archives using EIDR API for registrations

# Case study – Google Play avails

- Google Play deploys EMA Avails spec w/ EIDR IDs today
  - Primarily 1<sup>st</sup> and 2<sup>nd</sup>-level EIDR IDs
- Already deployed with 2 major partners
  - In progress with two more studios
- Asking all content partners to adopt
  - In discussions w/ partners across North America & Europe

# Quantified savings

## Processing Time for Batch of 1000 Avail Updates

	Before use of EMA Avails w/ EIDR	After use of EMA Avails w/ EIDR
Title matching, de-dupe, parsing, including research & partner communications	~25 hours	0.1 hour
Apply final updates & audit	~25 hours	0.1 hour
<b>Total</b>	<b>50 hours</b>	<b>0.2 hour</b>

**Reduces 50-hour reconciliation to <1/2 hour of processing time. Benefits multiply across *tens of thousands* of avails.**

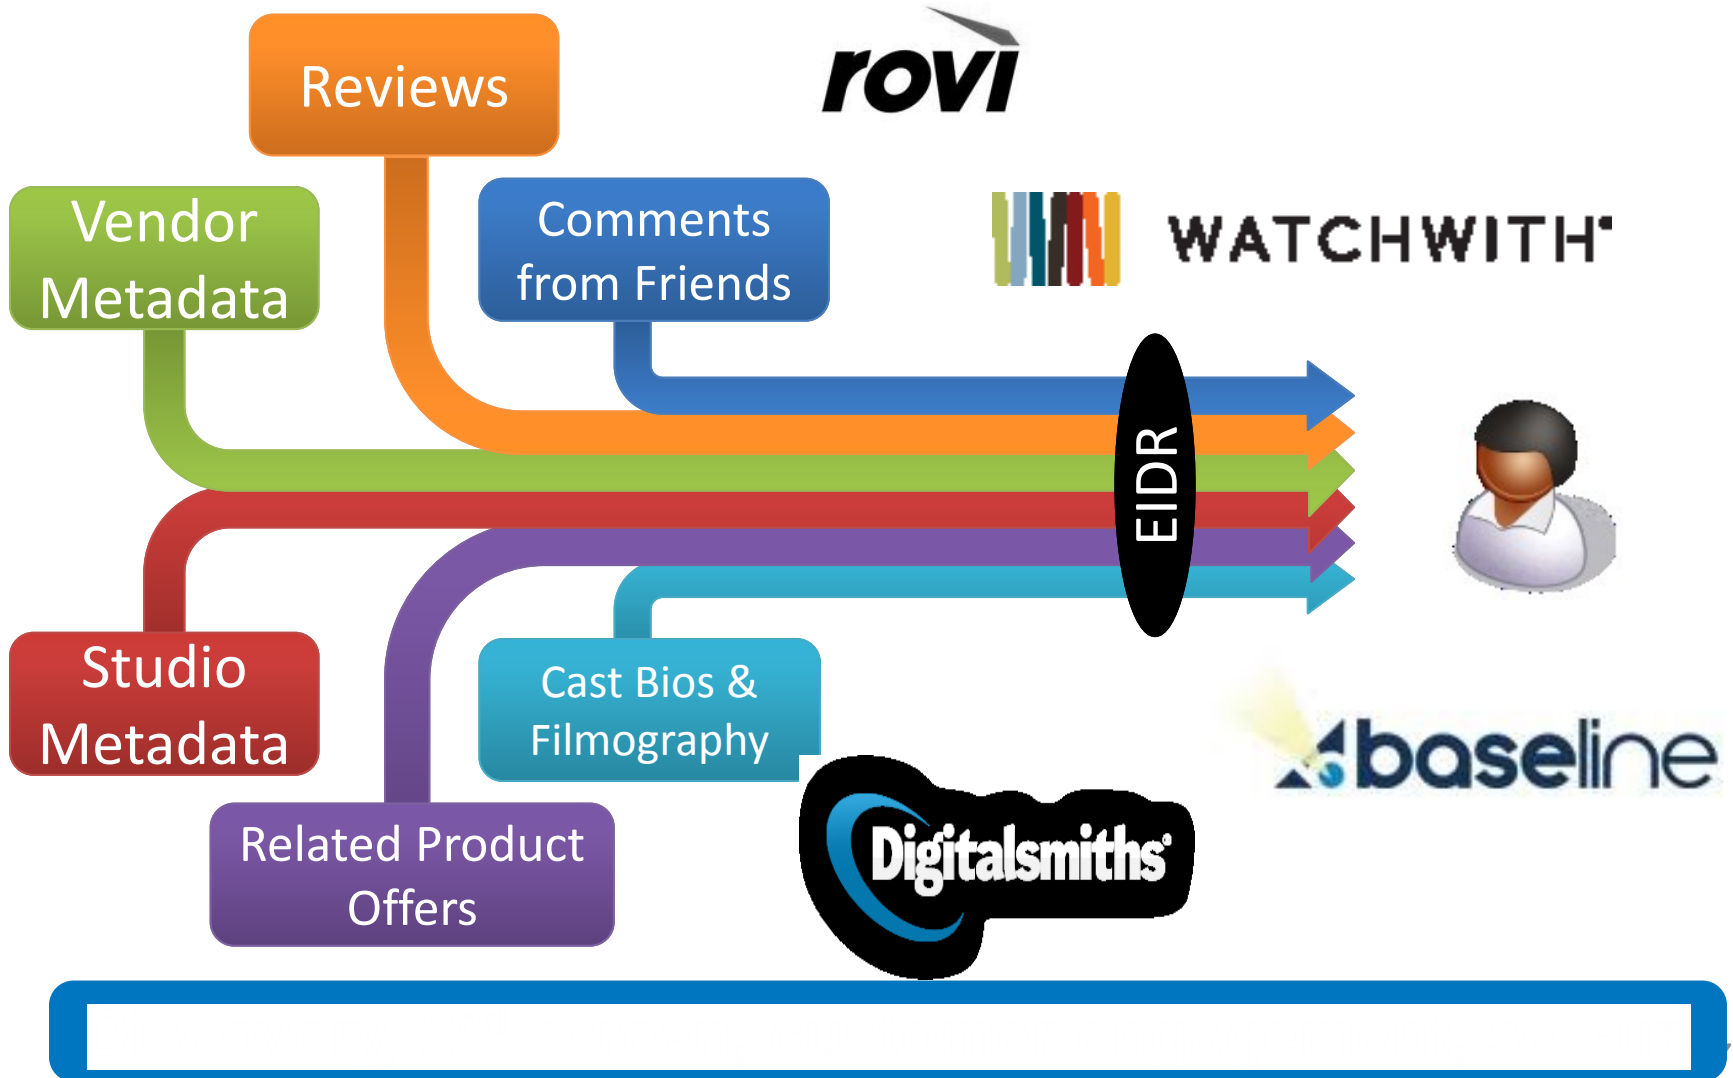

# Increases revenues

- New Comcast X1 platform has delivered double-digit increases in VOD sales
  - Uses EIDR to automate VOD ingestion & matching
- Streamlines dynamic ad insertion for VOD
- Lowers risk of missed window starts
  - Faster ingestion and setup for online retail
- Enables cross-platform delivery like UltraViolet
- Links screens, platforms, metadata sources, sales channels
- Enables new models for sell-up, direct audience measurement, micro-transactions

# EIDR glues it all together

- Goal = end-to-end automation of the digital supply chain
  - Order, ingest, market, upsell, track, report, reconcile, pay
  - Common, resolvable ID from start to finish
- Standards drive automation
- Specs bound with one common ID

# Metadata enrichment

# Social media discovery across MVPDs

# Ad industry benefits

- Panel ratings not sufficient for new TV platforms
- Ad industry needs to measure viewership across platforms
  - Smart phones, tablets, PCs, connected TVs, etc.
- Direct measurement offers greater reach and accuracy
- Requires standardized IDs for programs and ads
- CIMM-TAXI industry group endorses EIDR as program ID
  - \$500M annual savings from automated work flows
  - \$2B annual upside in new and better ad opportunities
- Supported by research chiefs of ESPN, Viacom, NBC, CBS, and others

# Delivers a data analysis advantage

- Link performance data from multiple sources
  - Theatrical
  - Home video - EST, iVOD, SVOD, UltraViolet
  - MVPDs – VOD, EST
  - Advertising – C3, C7, direct measurement, DAI
- Multiple vendors
  - Rentrak, Nielsen, DEG data tracking, MediaMorph
- Related titles
  - Series/season/episode
  - Franchises
- International & domestic

# Summary

## Equal, open access

- **Anyone** can use it
- **Any member** can register new records
- Published **API**
- **Religion-free** support for multiple development and integration models

## Practical management

- **Cross-company**
- **Cross-industry**
- **Collaborative**
- **Cheap**

## Infrastructure

- Providing IDs for commercial audio-visual works
- **Sharp focus** on the ID reduces complexity, provides clarity, speeds adoption

## Technology

- Based on international **standards**
- **Interoperability** a primary design point
- **Improves efficiency** in existing processes
- Supports creation of **new** products and services

# Technical Appendices

# Developer support

- Web UI
  - Register, modify, resolve, browse, query
- Simple tools
  - Register, modify, query, resolve, etc
  - Bulk change, manage alternate IDs
- SDK
  - REST, Java, .NET
  - Published as source, with sample applications (see above)
- Other tools
  - Bulk registration provided by system operator
  - Catalog matching tool (external vendor)
  - Ultraviolet CFF registration
- Help with Proof of Concept implementations

# Documentation

- Registrant documentation
  - Data fields guide
  - Best practices (Film, Episodic, and many corner cases)
- Technical documentation
  - Registry Users Guide, API documentation, a tutorial or two
- ID format guidelines
  - Standard, binary, URN, URI, compressed, etc
- Mapping guidelines for other metadata standards
  - ISAN, EN 15907, EBUCore
  - Base records only; taking input on versions and episodic

## Required fields for EIDR registration – standalone item (movie, OTO TV)

### Fields based on type/class of work

- Can be done algorithmically
- **Referent Type**
  - Movie, TV, Short, Web (also Series, Season, Composite, Compilation, Interactive, Supplemental)
- **Structural Type**
  - Abstraction, Performance, Digital, Physical
- **Mode**
  - Visual, Audiovisual, Audio, Other
- **Publication Status**
  - Valid, In development

### For a particular work

- Can usually be done algorithmically
- **Title and Title Language**
  - RFC 5646
- **Original Languages and Manifestations**
  - RFC 5646
  - Audio, Subtitle
- **Release Date**
  - YYYY (/MM/DD)
- **Approximate Length**
  - HH [:MM(:SS)]
- **Country of Origin**
  - ISO 3166-2, with extensions

# Requirements and Best practices

## Participants

- AssociatedOrg and Role
  - Company name or ID
  - Producer, Distributor, etc
- Directors
  - Up to 2 allowed
- Actors
  - Up to 4 allowed

## Must have

- 1 AssociatedOrg
- OR 1 Director
- OR 4 Actors

## Strongly Encouraged

- Alternate Title
  - Text Field
- Alternate ID
  - Ex. IMDb, ISAN, DOI, Proprietary IDs
- Participants beyond the minimum

# Further resources

- **Documentation**
